

Alternative Education Sessions | 2023

Do you have students who are struggling to access the demands of mainstream education?

We can offer you a nature-based setting with skilled educational leaders. In our Alternative Education provision, we deliver bespoke weekly sessions to groups of up to 4 students. These take into account the needs and interests of the group and aim to develop social and emotional wellbeing and mental health. All sessions take place in our stunning 55 acre woodland site.

Our highly experienced and trained tutors lead a variety of engaging topics ranging from Conservation and Bush Craft through to Art, Science and History. We run this programme over a 6 week course to enable the development of positive, trusting relationships with the tutor. Our track record of working with hard-to-reach young people in this way has had positive results in improving attendance, self-confidence and physical development.
